

MODELS BC01/02 AND BC03/04

Wine preservation system

Le Verre de Vin preservation system creates and retains a precisely controlled vacuum within partly consumed bottles. The system ensures that the maximum period of preservation is achieved without risking damage to the subtle structure of the wine. It is the perfect solution for restaurant owners wishing to expand their "by-the-glass" wine selection.

Four models are available:

- + BC01: Classic model, wall-mounted, for still wine only.
- + BC02: Classic model, wall-mounted, for still and sparkling wine (or Champagne).
- + BC03: Compact model, can be wall-mounted or sit on/under a bar, for still wine only.
- + BC04: Compact model, can be wall-mounted or sit on/under a bar, for still and sparkling wine (or Champagne).

MODELS BC01/02 AND BC03/04

Wine preservation system

FEATURES

- + Can re-seal a 750ml bottle in 2 to 5 seconds (depending on the volume of wine left within the bottle)
- + Illuminated indicators: amber (re-sealing in progress) or green (re-sealing completed)
- + Automatic cut off to ensure precise regulation of vacuum levels
- + Simple to install and use
- + Patent granted in all the world's major wine consuming markets
- + Wall mounting plate and fixing kit
- + 20 re-usable still wine stoppers
- + 12 months warranty
- + Numerous options available: additional still wine stoppers, stainless free standing column mounting, 90° mounting bracket, chrome cover... Contact us for more details.

INSTALLATION

- + Allow at least 400mm (16") from the underside of the system to the bar/work surface to enable bottles to be presented for re-sealing.
- + Power supply: 110V/60Hz
- + Do not enclose or shroud the system.
- + The system is pre-set to operate in locations at an altitude of 0 to 500m (1650') above sea level. For locations above this altitude, refer to your distributor.

Wall-mounted Classic model with chrome cover

- D'Vine Grape and Spirit Bar, Reval Hotel, Riga (Latvia)
