

MODELS BC31/32/33/34 ::: 32 BOTTLES

Wine preservation system and twin temperature refrigeration display unit

The Barclay Bar combines the *Le Verre de Vin* wine preservation system with a twin temperature refrigeration system (for red and white wine) in a single unit. By creating and retaining a precisely controlled vacuum within partly consumed bottles, the system ensures that the maximum period of preservation is achieved without risking damage to the subtle structure of the wine. It is the perfect solution for restaurant owners wishing to expand their "by-the-glass" wine selection.

FEATURES

- + For *Le Verre de Vin* system features, refer to the corresponding technical sheet
- + Twin temperature refrigeration areas
- + Stores up to 32 wine bottles
- + Adjustable thermostat for ideal temperature controlled conditions
- + Simple to install and use
- + 12 months warranty
- + Options available: hand turned black ash carousel with bronze or stainless steel rail, solid brass or stainless steel door padlock (with 2 keys)

INSTALLATION

- + The front of the unit should sit flush with the bar top, table top, or shelf mounting to enable bottles to be presented for re-sealing.
- + Do not enclose or shroud the system.
- + The system is pre-set to operate in locations at an altitude of 0 to 500m (1650') above sea level. For locations above this altitude, refer to your distributor.
